No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher. *Exceptions:* It is the policy of Academic Press that authors need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

The appearance of the code at the bottom of the first page of an article in this journal indicates the Publisher's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1997 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

# CONTENTS OF VOLUME 251

NUMBER 1, AUGUST 15, 1997

## REVIEW

- Affinity Capillary Electrophoresis: A Sensitive Tool for the Study of Molecular Interactions and Its Use in Microscale Analyses *Kiyohito Shimura and Ken-ichi Kasai* 1

## REGULAR ARTICLES

- Characterization of Gonadotropin-Releasing Hormone Analogs Based on a Sensitive Cellular Luciferase Reporter Gene Assay *Thomas Beckers, Helmut Reiländer, and Peter Hilgard* 17
- Electrochemical Detection and Quantification of the Acetylated and Deacetylated C8-Deoxyguanosine DNA Adducts Induced by 2-Acetylaminofluorene *Sandra A. M. Bol, Anton J. L. de Groot, Roeline B. Tijdens, John H. N. Meerman, Leon H. F. Mullenders, and Albert A. van Zeeland* 24
- Specific and Amplified Current Responses to Histidine and Histamine Using Immobilized Copper-Monoamine Oxidase Membrane Electrode, Based on Novel Ascorbate Oxidase Activity Induced by Exogenous Ligands *Yasushi Hasebe, Seiichi Toda, Kazuo Aoki, Hiroshi Tonobe, and Shunichi Uchiyama* 32
- Measuring Cholesterol in Macrophages: Comparison of High-Performance Liquid Chromatography and Gas-Liquid Chromatography with Enzymatic Fluorometry *Paul Cullen, Karin Tegelkamp, Manfred Fobker, Frank Kannenberg, and Gerd Assmann* 39
- Determination of the Kinetic Parameters for Phospholipase C (*Bacillus cereus*) on Different Phospholipid Substrates Using a Chromogenic Assay Based on the Quantitation of Inorganic Phosphate *Paul J. Hergenrother and Stephen F. Martin* 45
- Semiautomated Resolution of Overlapping Stutter Patterns in Genomic Microsatellite Analysis *Mark J. Miller and Bao-Zhu Yuan* 50
- Comprehensive Analysis of Organic Ligands in Whole Root Exudates Using Nuclear Magnetic Resonance and Gas Chromatography-Mass Spectrometry *Teresa W.-M. Fan, Andrew N. Lane, Judy Pedler, David Crowley, and Richard M. Higashi* 57
- A Nonradioactive Double Detection Method for the Assignment of Spots in Two-Dimensional Blots *Mireille Chevallet, Vincent Procaccio, and Thierry Rabilloud* 69
- Determination of Recombinant Protein in Animal Cell Culture Supernatant by Near-Infrared Spectroscopy *Sven Harthun, Kathrin Matischak, and Peter Friedl* 73
- Homogeneous Two-Site Immunometric Assay Kinetics as a Theoretical Tool for Data Analysis *Emmanuel Zuber, Gérard Mathis, and Jean-Pierre Flandrois* 79
- Milk Oligosaccharide Profiles by Reversed-Phase HPLC of Their Perbenzoylated Derivatives *Prasoon Chaturvedi, Christopher D. Warren, Guillermo M. Ruiz-Palacios, Larry K. Pickering, and David S. Newburg* 89
- Fluorometric and Colorimetric Detection of Caspase Activity Associated with Apoptosis *Vanessa Gurtu, Steven R. Kain, and Guohong Zhang* 98
- Rate Zonal Sedimentation of Proteins in One Hour or Less *Nirmal S. Basi and R. Victor Rebois* 103

## NOTES & TIPS

- Development of a MIMIC-Based Polymerase Chain Reaction Technique for the Analysis of Prostaglandin Endoperoxide H Synthase Isoenzyme cDNAs *Nives Zimmermann, Paul F. Cavanaugh, Jr., Michael K. Doney, Nadeem Haq, Jack L. Gluckman, and Zlatko P. Pavelic* 110
- Simple Procedure for Reversed-Phase High-Performance Liquid Chromatographic Purification of Long Hydrophobic Peptides That Form Transmembrane Helices *Scott Lew and Erwin London* 113
- Separation of Phosphopeptides from Their Nonphosphorylated Forms by Reversed-Phase POROS Perfusion Chromatography of Alkaline pH *Hiroyuki Matsumoto, Esther S. Kahn, and Naoka Komori* 116

|                                                                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Determination of Monosaccharides Derivatized with 2-Aminobenzoic Acid by Capillary Electrophoresis<br><i>Kae Sato, Kiichi Sato, Akira Okubo, and Sunao Yamazaki</i>                                        | 119 |
| A Simple Assay for the Detection of Native and Recombinant Protease Activity<br><i>Hans-Eckhardt Hagen, Sabine Lieselotte Kläger, James Hobson McKerrow, and Peter John Ham</i>                            | 121 |
| A Two-Dimensional, Diagonal Sodium Dodecyl Sulfate–Polyacrylamide Gel Electrophoresis Technique to Screen for Protease Substrates in Protein Mixtures<br><i>H. Peter Nestler and Andrea Doseff</i>         | 122 |
| Using Magnetic Beads to Isolate Inside-Out Glut1-Containing Vesicles from 3T3-L1 Adipocyte Plasma Membranes<br><i>Maxine D. Fisher and Susan C. Frost</i>                                                  | 125 |
| Isolation of Transport-Competent Secretory Vesicles from <i>Saccharomyces cerevisiae</i><br><i>Anthony Ambesi, Kenneth E. Allen, and Carolyn W. Slayman</i>                                                | 127 |
| A Cell-Based Assay for Brevetoxins, Saxitoxins, and Ciguatoxins Using a Stably Expressed <i>c-fos</i> –Luciferase Reporter Gene<br><i>Elizabeth R. Fairey, J. Stewart G. Edmunds, and John S. Ramsdell</i> | 129 |

|                                                                                                                                                                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Quenched BODIPY Dye-Labeled Casein Substrates for the Assay of Protease Activity by Direct Fluorescence Measurement<br><i>Laurie J. Jones, Rosalyn H. Upson, Rosaria P. Haugland, Nataliya Panchuk-Voloshina, Mingjie Zhou, and Richard P. Haugland</i>                                             | 144 |
| Cycling Assay for Nicotinamide Adenine Dinucleotides: NaCl Precipitation and Ethanol Solubilization of the Reduced Tetrazolium<br><i>Yves Gibon and François Larher</i>                                                                                                                             | 153 |
| Large-Scale Immunohistological Staining Using Polyethylene Glycol-Embedded Sections Mounted on 96-Well Plates for Monoclonal Antibody Screening<br><i>Tohru Komiya, Yoko Tanigawa, Shohei Oda, and Setsuo Hirohashi</i>                                                                             | 158 |
| <i>In Vivo</i> Dielectric Analysis of Free Water Content of Biomaterials by Time Domain Reflectometry<br><i>Satoru Naito, Masato Hoshi, and Satoru Mashimo</i>                                                                                                                                      | 163 |
| Quantitative Determination of Gene Expression by Competitive Reverse Transcription–Polymerase Chain Reaction in Degraded RNA Samples<br><i>Dan Tong, Christian Schneeberger, Sepp Leodolter, and Robert Zeillinger</i>                                                                              | 173 |
| Sedimentation Field-Flow Fractionation of Cellular Species<br><i>Jean Marc Metreau, Sacha Gallet, Philippe J. P. Cardot, Valérie Le Maire, Frédéric Dumas, Alain Hernvann, and Sylvain Loric</i>                                                                                                    | 178 |
| Quantitation of Protein-Bound 3-Nitrotyrosine and 3,4-Dihydroxyphenylalanine by High-Performance Liquid Chromatography with Electrochemical Array Detection<br><i>Kenneth Hensley, M. L. Maidt, Q. N. Pye, C. A. Stewart, M. Wack, T. Tabatabaie, and R. A. Floyd</i>                               | 187 |
| Identification of New Medium-Chain Acylcarnitines Present in Normal Human Urine<br><i>Raymond Libert, François Van Hoof, Marc Thillaye, Marie-Françoise Vincent, Marie-Cécile Nassogne, Vincent Stroobant, Edmond de Hoffmann, and André Schanck</i>                                                | 196 |
| Spectrophotometric Assay for Superoxide Dismutase Based on Tetrazolium Salt 3'-[1-(Phenylamino)-carbonyl]-3,4-tetrazolium}-bis(4-methoxy-6-nitro)benzenesulfonic Acid Hydrate Reduction by Xanthine–Xanthine Oxidase<br><i>Hiroyuki Ukeda, Susumu Maeda, Toshinao Ishii, and Masayoshi Sawamura</i> | 206 |

|                                                                                                                                                                                        |                                                                                                                                                               |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Capillary Electrophoresis with Laser-Induced Fluorescence Detection for the Analysis of Free and Immune-Complexed Green Fluorescent Protein                                            | <i>Gina M. Korf, James P. Landers, and Dennis J. O'Kane</i>                                                                                                   | 210 |
| Chemical Microdetermination of Heparin in Plasma                                                                                                                                       | <i>Toshihiko Toida, Yong Huang, Yukio Washio, Tomohiro Maruyama, Hidenao Toyoda, Toshio Imanari, and Robert J. Linhardt</i>                                   | 219 |
| The Staining of Acidic Proteins on Polyacrylamide Gels: Enhanced Sensitivity and Stability of "Stains-All" Staining in Combination with Silver Nitrate                                 | <i>Harvey A. Goldberg and Kevin J. Warner</i>                                                                                                                 | 227 |
| Measurement of Prebeta-1 HDL in Human Plasma by an Ultrafiltration-Isotope Dilution Technique                                                                                          | <i>P. M. O'Connor, J. M. Naya-Vigne, P. N. Duchateau, B. Y. Ishida, M. Mazur, S. A. Schoenhaus, B. R. Zysow, M. J. Malloy, S. T. Kunitake, and J. P. Kane</i> | 234 |
| Synthesis and Spectral Characterization of a Thiol-Reactive Long-Lifetime Ru(II) Complex                                                                                               | <i>Ewald Terpetschnig, Jonathan D. Dattelbaum, Henryk Szmanski, and Joseph R. Lakowicz</i>                                                                    | 241 |
| Apparent $Mg^{2+}$ -Adenosine 5-Triphosphate Dissociation Constant Measured with $Mg^{2+}$ Macroelectrodes under Conditions Pertinent to $^{31}P$ NMR Ionized Magnesium Determinations | <i>Weiqi Zhang, Anita C. Truttmann, Daniel Lüthi, and John A. S. McGuigan</i>                                                                                 | 246 |
| Denaturation and Association of DNA Sequences by Certain Polypropylene Surfaces                                                                                                        | <i>Boris P. Belotserkovskii and Brian H. Johnston</i>                                                                                                         | 251 |
| A Microtiter-Based Assay for Hyaluronidase Activity Not Requiring Specialized Reagents                                                                                                 | <i>Gregory I. Frost and Robert Stern</i>                                                                                                                      | 263 |
| Fiberoptic DNA Sensor Array Capable of Detecting Point Mutations                                                                                                                       | <i>Brian G. Healey, Robert S. Matson, and David R. Walt</i>                                                                                                   | 270 |
| A System for the Quantitation of DNA Using a Microtiter Plate-Based Hybridization and Enzyme Amplification Technology                                                                  | <i>M. Fisher, S. Harbron, and C. J. Taylorson</i>                                                                                                             | 280 |

#### NOTES & TIPS

|                                                                                                           |                                                                          |     |
|-----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|-----|
| Locating Western Blotted and Immunostained Proteins within Complex Two-Dimensional Patterns               | <i>Carla D. Fultz and Frank A. Witzmann</i>                              | 288 |
| Single-Step Method of Total RNA Isolation by Sodium Dodecyl Sulfate/Phenol Extraction from Cultured Cells | <i>Jubao Duan, Xin Cai, Limei Zhou, and Jiayi Wang</i>                   | 291 |
| Enhancement of Transfection Efficiency by Using Oligodeoxyribonucleotide as Carrier                       | <i>Ming-Chih Lai, Yuung-Chiarng Wang, Feng-Yuan Yang, and Lo-Chun Au</i> | 292 |
| A Combined Assay for DNA, Protein, and Incorporated [ $^3H$ ] Label in Cultured Muscle Cells              | <i>Charlotte Rehfeldt and Kathrin Walther</i>                            | 294 |
| Evaluation of Hydroxyl Radical-Scavenging Ability by Chemiluminescence                                    | <i>Osamu Hirayama and Masakatsu Yida</i>                                 | 297 |
| Effect of Acid Concentration on Chromogen Formation from Hexoses in Sulfuric Acid-Based Reactions         | <i>H. Madhukar Mallya and T. N. Pattabiraman</i>                         | 299 |

#### NOTICE

The Subject Index for Volume 251 will appear in the December 15, 1997, issue as part of a cumulative index for the year 1997.
